Ladiva, vantaggi

Ladiva, advantages

PASTA BIANCA *WHITE BODY*

Tutti i nostri prodotti da rivestimento sono realizzati con pura pasta bianca, mentre i pavimenti con gres porcellanato.
All our wall tiles are made with pure white body, while the floors are made with porcelain stoneware.

PRESSATURA AD OLIO *FORM BY OIL PRESSING*

Tutti i nostri prodotti sia da rivestimento che da pavimento sono realizzati con il metodo di pressatura, mediante presse con contromarche ad olio.
All our products, both for walls and floors, are made using the pressing method, using oil presses with counter-brands.

100% UNICO TONO *NO CADMIUM ADN LEAD*

Tutti i nostri prodotti sono smaltati su richiesta del cliente, avenedo noi un unico supporto (Pasta Bianca), un unico sistema di produzione (Pressatura ad Olio), quando prepariamo un ordine, smaltiamo allo stesso tempo tutto, garantendo cosi un unico TONO
All our products are free from the danger of excess CADMIUM and LEAD, because our health and your health is more important than a business.

UNICO SPESSORE *ONE THICKNESS*

Tutti i nostri prodotti sia da rivestimento che da pavimento hanno lo spessore da 10mm.
All our products for both walls and floors have a thickness of 10mm.

MODULARITA' *MODULARITY*

Tutti i nostri prodotti sono modulari tra loro, le dimensioni di ogni piastrelle sono calcolate considerando anche la fuga, per il rivestimento tra 1,3 e 1,6mm mentre per il pavimento tra 2,3 e 2,6mm.
All our products are modular with each other, the dimensions of each tiles are calculated also considering the joint, being for the wall 1.3 and 1.6mm while for the floor between 2.3 and 2.6mm.

RILIEVO *RELIEF*

Tutti i nostri decori sono fatti tramite rilievo, noi crediamo che un decoro se lo vedi e lo tocchi ha piu valore di un decoro che puoi solo guardare classico della serigrafia.
All our decorations are done through relief, we believe that a decoration, if seen and touched, has more value than a decoration that you can only look at classic screen printing.

NO CADMIMIO E PIOMBO *NO CADMIUM ADN LEAD*

Tutti i nostri prodotti sono esenti dal pericolo dell'eccesso di CADMIO e PIOMBO, perche' la nostra e la vostra salute e' piu importante di un affare.
All our products are free from the danger of excess CADMIUM and LEAD, because our health and your health is more important than a business.

Colori, senza tempo

Colors, timeless

Colori Ladiva. La nostra scala colori, parte da concetti basici.
Personalmente ho creato la scala colori, cercando di prendere quello che
madre natura ci propone, perché per me un
interno, deve essere parte integrante dell'esterno e al
mondo che ci circonda.La somma dei colori, quindi, genera
il bianco e per cui si parla di sintesi additiva, questo è
stato il primo colore che ho scelto. Il nostro bianco:

RGB
SINTESI ADDITIVA
FONTI DI LUCE

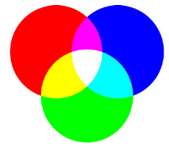

Opposta alla sintesi additiva, c'è la sottrattiva e quindi il colore nero. Il
nostro nero

RGB
SINTESI ADDITIVA
FONTI DI LUCE

Con questi 2 colori, ho ottenuto la prima gamma colori dal bianco al nero
in 8 gradazioni, facendo attenzione a non cadere
nell'errore di creare dei toni freddi, quindi lavorando con le solite basi di
rosso, blu e verde e dei suoi derivati.
La stretta parentela del marrone con il grigio fa sì che sia un colore
difficile da creare, spesso il marrone viene anche
chiamato come "Grigio Sbagliato".
Regolare le proporzioni di tre ingredienti, rende il gioco
complicato, soprattutto perché si rischia, ad ogni errore, di
ricadere in un grigiastro senza carattere, simile a quello già
fatto nella prima scala colori.
Ottenuto il nostro marrone, abbiamo miscelato lo stesso con il bianco che
avevamo in precedenza, correggendo nelle
8 tonalità il colore ottenuto. Questa scala colori dall'avorio al marrone,
ha il fascino di non avere quell'effetto di tono caldo.
Quando parliamo di colore nel senso percettivo,
non è facile descriverlo con esattezza.
Un fisico potrebbe descrivere l'onda,
con la sua lunghezza e la sua frequenza,
ma artisti, grafici e designer utilizzano altri parametri,
io personalmente ho cercato di creare una scala cromatica
in linea con il mio concetto di piastrelle, dove quello
che per me conta è che il prodotto non stanchi mai e non
"invecchi mai". Ho scelto infatti un sistema a decoro tattile
(rilievo) perché in base al punto luce ha sempre riflessioni
diverse ed aggiunto dei colori basici come sopra descritto sulla superfi-
cie. Con questo sistema, spero di aver dato ad ogni
architetto designer ed artista d'interni, la possibilita' di
spaziare con qualsiasi cosa sia di loro gradimento dopo,
perché la mia ceramica ed il mio colore sono da ritenersi un
involucro neutro, un foglio di carta bianca.
Ladiva, NEVER GETS OLD, Fabio Pesce

***Ladiva Colors**. Our shade guide starts from basic concepts.*
Personally I created the shade guide, trying to take what mother nature
offers us, because for me an
internal, must be an integral part of the exterior and all
world that surrounds us. The sum of the colors,
therefore, generates white and for which we speak of additive synthesis,
this is it was the first color I chose. Our white:

RGB
ADDITIVE SUMMARY
SOURCES OF LIGHT

Opposite to additive synthesis, there is the subtractive and
therefore the black color. Our black

RGB
ADDITIVE SUMMARY
SOURCES OF LIGHT

With these 2 colors, I got the first color range from white to black in 8
shades, being careful not to fall out in the error of creating cold tones,
then working with the usual bases of red, blue and green and its deriva-
tives. The close relationship of brown with gray makes it a difficult
color to create, often brown also comes
called as "Wrong Gray".
Adjusting the proportions of three ingredients makes the
game complicated, above all because you risk, with every
mistake, of falling back into a characterless grayish,
similar to that already done in the first shade guide.
Having obtained our brown, we mixed the same with the
white we had previously, correcting in the 8 shades the color obtained.
This color scale from ivory to brown has charm
not to have that warm tone effect.
When we talk about color in the perceptual sense,
it is not easy to describe it exactly. A physicist could describe the wave,
with its length and frequency, but artists, graphic designers and desi-
gners use other parameters, I personally tried to create a chromatic scale
in line with my concept of tiles, where that
what counts for me is that the product never gets tired and never
"Never gets old". In fact, I chose a tactile decoration system
(relief) because according to the light point it always has reflections
different and added basic colors as described above on the
surface. With this system, I hope I have given each
architect designer and interior artist, the possibility of
range with whatever they like after,
because my ceramic and my color are to be considered a
neutral wrapper, a sheet of white paper.
Ladiva, NEVER GETS OLD, Fabio Pesce

Made in Italy

L'importanza del Made in Italy nel mondo.

Il prestigio dell'Industria italiana è dovuto a una serie di prodotti di eccellenza ai quali vengono riconosciuti: un alto livello qualitativo dei materiali utilizzati, stile raffinato, innovazione, cura dei dettagli, fantasia delle soluzioni
adottate, capacità di durare nel tempo. Per indicare queste qualità si usa l'espressione Made in Italy, "prodotto in Italia", segnalando così l'origine italiana di un prodotto industriale o artigianale destinato sia ai mercati internazionali sia a quello italiano. I prodotti italiani più esportati nel mondo, grazie anche alla loro origine riguarda l'abbigliamento, le calzature, l'arredamento, l'agroalimentare, le automobili e altre
produzioni del comparto metalmeccanico,
come lo scooter denominato vespa.
Il made in Italy
Secondo alcune ricerche di mercato, l'espressione
Made in Italy è nota nel mondo quasi allo stesso livello di due Marchi commerciali universalmente famosi come
Coca-Cola e Visa. Come tutto ciò che ha successo
nell'economia, la segnalazione made in Italy è s
oggetta a usi scorretti. Può infatti capitare che
venga apposta, per indurre in inganno i compratori, anche su prodotti di origine non italiana. Per questa ragione
l'uso dell'espressione made in Italy è
regolato da numerose leggi italiane e da accordi
internazionali. Oggi il requisito fondamentale che deve
avere un prodotto commerciale per poter essere
classificato con l'indicazione made in Italy è che sia
stato progettato, ideato, disegnato e
industrialmente o artigianalmente prodotto in Italia.

The importance of Made in Italy in the world

*The prestige of Italian industry is due to a series of products of excellence to which they
are recognized: a high
quality level of the materials used, refined style, innovation, attention to detail, immagination
of the solutions
adopted, the ability to last over time. To indicate these
qualities, the expression Made in Italy is used, "produced in Italy", thus signaling the Italian origin of an industrial or artisan product destined for both international and Italian markets. The most exported Italian products in the world, thanks to also their origin, concern clothing, footwear, furniture, agri-food, cars and other products in the
engineering sector, such as the scooter called Vespa.
Made in Italy
According to some market research, the expression Made in Italy is known around the world at almost the same level as two
universally famous commercial brands such as
Coca-Cola and Visa. Like everything that is successful in the economy, made in Italy reporting is subject to misuse. In fact, it may happen that it is on purpose, to deceive buyers,
even on products of non-Italian origin. For this reason,
the use of the expression made in Italy is governed by
numerous Italian laws and international
agreements. Today the fundamental requirement is that a commercial product must have in order
to be classified with the
indication made in Italy is that it has been projected, conceived, designed and industrially or handcrafted produced in Italy.*

Responsabilita' Sociale

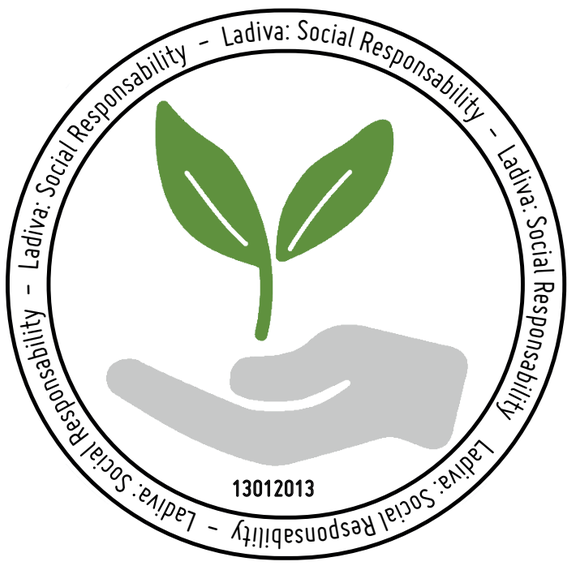

Social Responsability

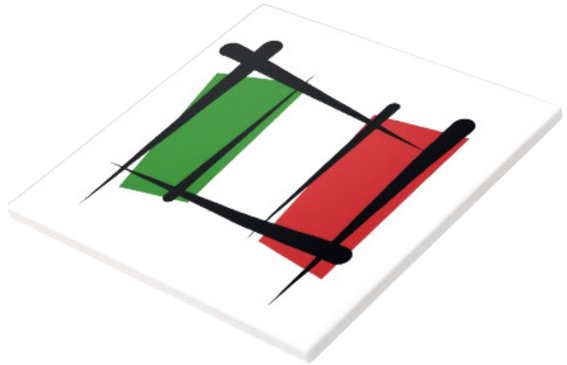

La Responsabilità Sociale della Ladiva si esprime in fatti concreti.

Creiamo superfici per gli spazi del vivere quotidiano, prendendo in considerazione il rispetto per l'uomo e la natura; un dovere essenziale.
La nostra responsabilità sociale, si esprime in questi piccoli concetti:
L'impatto ambientale dei nostri processi produttivi. Questo è ridotta al minimo grazie ad un impianto di cogenerazione alimentato a metano che garantisce sia un protocollo di completa autosufficienza energetica ed anche un sistema di recupero mantenuto del raffreddamento ad acqua a causa dell'aria calda emessa dai forni lineari.
La tutela delle risorse naturali. Questo consiste nel limitare i rifiuti grezzi, il consumo di energia termica, il consumo di energia elettrica e l'acqua utilizzata.
L'ambiente e la salute. Fatto offrendo ai nostri clienti prodotti privi di agenti cancerogeni, realizzati in impianti a basse emissioni e sicuri per i lavoratori e le comunità circostanti.
Ultimo concetto e il più importante, NOI non produciamo se TU non chiedi! Per noi, è inutile produrre piastrelle, per poi conservare nel deposito perchè invendute.
Siamo l'unica azienda al mondo oggi che produce su richiesta, produciamo quello che vuoi. Ricordati che l'inquinamento maggiore è il superfluo, NOI non lo abbiamo.

Ladiva's social responsibility is expressed in concrete facts.

We create surfaces for everyday living spaces, where respect for humans and nature is talen into consideration and is of essential duty.
Our social responsibility is expressed and conceived throught these small concepts:
The environmental impact of our production processes. This is reduced to a minimum thanks to a cogeneration plant powered by methane that guarantees both a complete energy self-sufficienct protocol and a recovery system maintained by a water cooling system for the hot air emitted by the linear furnaces.
The protection of natural resources, which endure on limiting raw waste, the consumption of thermal energy, the electricity consumption and the water utilized.
The environment and health. Done by offering our customers products which are free of carcinogens, made in low-emission plants and safe for workers and surrounding communities.
Last concept and the most important, WE do not produce if YOU do not ask! For us, it is useless to produce tiles, for them to sit unsold in the warehouse. We are the only company in the world today that produces on demand, we produce what you want.
Remember that the greatest pollutant is done through the superfluous, WE do not have that.

Ceramica Italiana

TUTTI I PRODOTTI LADIVA® SONO IDEATI, REALIZZATI, PRODOTTI E SMALTATI ESCLUSIVAMENTE IN ITALIA

ALL PRODUCTS LADIVA® ARE DESIGNED, REALIZED, PRODUCED AND GLAZED EXCLUSIVELY IN ITALY
